The latest national energy plan highlights three main areas of development: utility-scale solar, biomass, and coal-based generation. A major part of this transition is the Tsamela Solar

Speaking on behalf of His Majesty King Mswati III at COP26, the Prime Minister of Eswatini, His Excellency Cleopas Sipho Dlamini, pledged that the country will

There are currently five power plants operating in Eswatini with a total installed capacity of close to 110 MW. These plants utilize hydro, biomass, and solar PV plant technologies. The rest of the electricity

The main challenges facing the energy sector include the reliance on power imports from South Africa; which is also facing its own power generation problems; lack of clarity in roles for procurement

Eswatini has added two more solar photovoltaic (PV) plants to its sustainable energy portfolio, as another of its projects - the Lavumisa 10 MW solar PV plant - nears completion. In a

Residential Discover our tailored solar solutions designed to meet the unique energy needs of your home, providing sustainable and cost-effective power.

Looking into renewables, the policy brief shows that Eswatini's estimated theoretical and technical hydropower potential is 440MW and 110MW,

As Eswatini continues to expand its solar energy capacity, the country will become a leader in renewable energy adoption in Africa. These national

Eswatini has large quantities of renewable biomass resources, and some companies from its sugar and timber industries are already using biomass

This landmark initiative marks a pivotal moment in the country's national renewable energy strategy,

Solar energy swaziland

transitioning Eswatini from a heavy reliance on imported electricity to a locally driven solar

The drive toward renewable energy is central to Eswatini's long-term vision. Solar and biomass projects promise cleaner air, lower costs, and reduced reliance on imported electricity.

The ministry of natural resources and energy confirmed that the Eswatini Energy Regulatory Authority (ESERA) has recently issued an intention

Here you can find an overview of all our ongoing and completed solar energy initiatives. These projects represent our commitment to advancing renewable energy solutions across various institutions.

Are solar panels a viable source of electricity in Eswatini? Photovoltaic (PV) solar cells are increasingly prominent sources of small-scale electricity production in Eswatini. The government

The Government of Eswatini has signed a contract with renewable power producer Frazium Energy (FZM) for a 100MW solar park.
