Rezolv Energy is building the 225 MW St. George solar park in Bulgaria, transforming an abandoned airport into a renewable energy hub with

Ardagh Glass Packaging-Europe (AGP-Europe), a division of Ardagh Group, has secured a long-term virtual power purchase agreement (VPPA) with

Rezolv Energy, supported by UK investment firm Actis, has secured up to EUR90 million in debt financing for the construction of the 225 MW St. George solar power plant in northeastern

St. George Solar plant, 229MW, one of Bulgaria's largest solar power facilities St. George will be built on the site of the former decommissioned Silistra airport.

This includes "St. George", a 225 MW solar plant which is being built on the site of the decommissioned Silistra airport. Once onstream next year, it will

The solar was a room in many English and French medieval manor houses, great houses and castles, mostly on an upper storey, designed as the family's private living and sleeping quarters. [1]

Ardagh Glass Packaging-Europe (AGP-Europe), an operating business of Ardagh Group, announced today

St George solar Glass Solar Room

that it has entered a long-term Virtual Power Purchase Agreement (VPPA) with Rezolv

ARDAGH Glass Packaging-Europe has entered a long-term Virtual Power Purchase Agreement (VPPA) with Rezolv Energy's St. George solar photovoltaic (PV) project in Bulgaria,

Buy the best solar glass for your office, home, school, university or any other building from the No.1 manufacturer of solar control glass in the UK.

The St. George solar park will be built on a brownfield site: the former Silistra airport, a decommissioned airfield covering 165 hectares. The project will comprise nearly 400,000

The VPPA covers Rezolv Energy's planned Bulgarian 229MW St George solar project, which will provide renewable electricity to AGP-Europe's manufacturing plants across the continent.

Like all of Rezolv's projects, St. George is very large. Solar projects of this size require a few different things - not least available land, good solar irradiation and capacity for grid access close to the site.
